

Github

The screenshot shows a Windows PowerShell terminal window with the title bar "powershell". The terminal output displays the Git command-line help text. At the top, it says "PS C:\Users\Admin\Desktop\bhavani> git". Below this is the "usage:" section followed by a list of options: `git [-v | --version] [-h | --help] [-C <path>] [-c <name>=<value>] [--exec-path=<path>] [--html-path] [--man-path] [--info-path] [-p | --paginate | -P | --no-pager] [--no-replace-objects] [--bare] [--git-dir=<path>] [--work-tree=<path>] [--namespace=<name>] [--config-env=<name>=<envvar>] <command> [<args>]`. The text then lists common Git commands grouped into sections: "start a working area", "work on the current change", "examine the history and state", "branch", "collaborate", and "push". The Windows taskbar is visible at the bottom, showing the Start button, a search bar, and several application icons. The system tray on the right shows the date and time as 02:00 on 03/10/2023.

```
PS C:\Users\Admin\Desktop\bhavani> git
usage: git [-v | --version] [-h | --help] [-C <path>] [-c <name>=<value>]
        [--exec-path=<path>] [--html-path] [--man-path] [--info-path]
        [-p | --paginate | -P | --no-pager] [--no-replace-objects] [--bare]
        [--git-dir=<path>] [--work-tree=<path>] [--namespace=<name>]
        [--config-env=<name>=<envvar>] <command> [<args>]

These are common Git commands used in various situations:

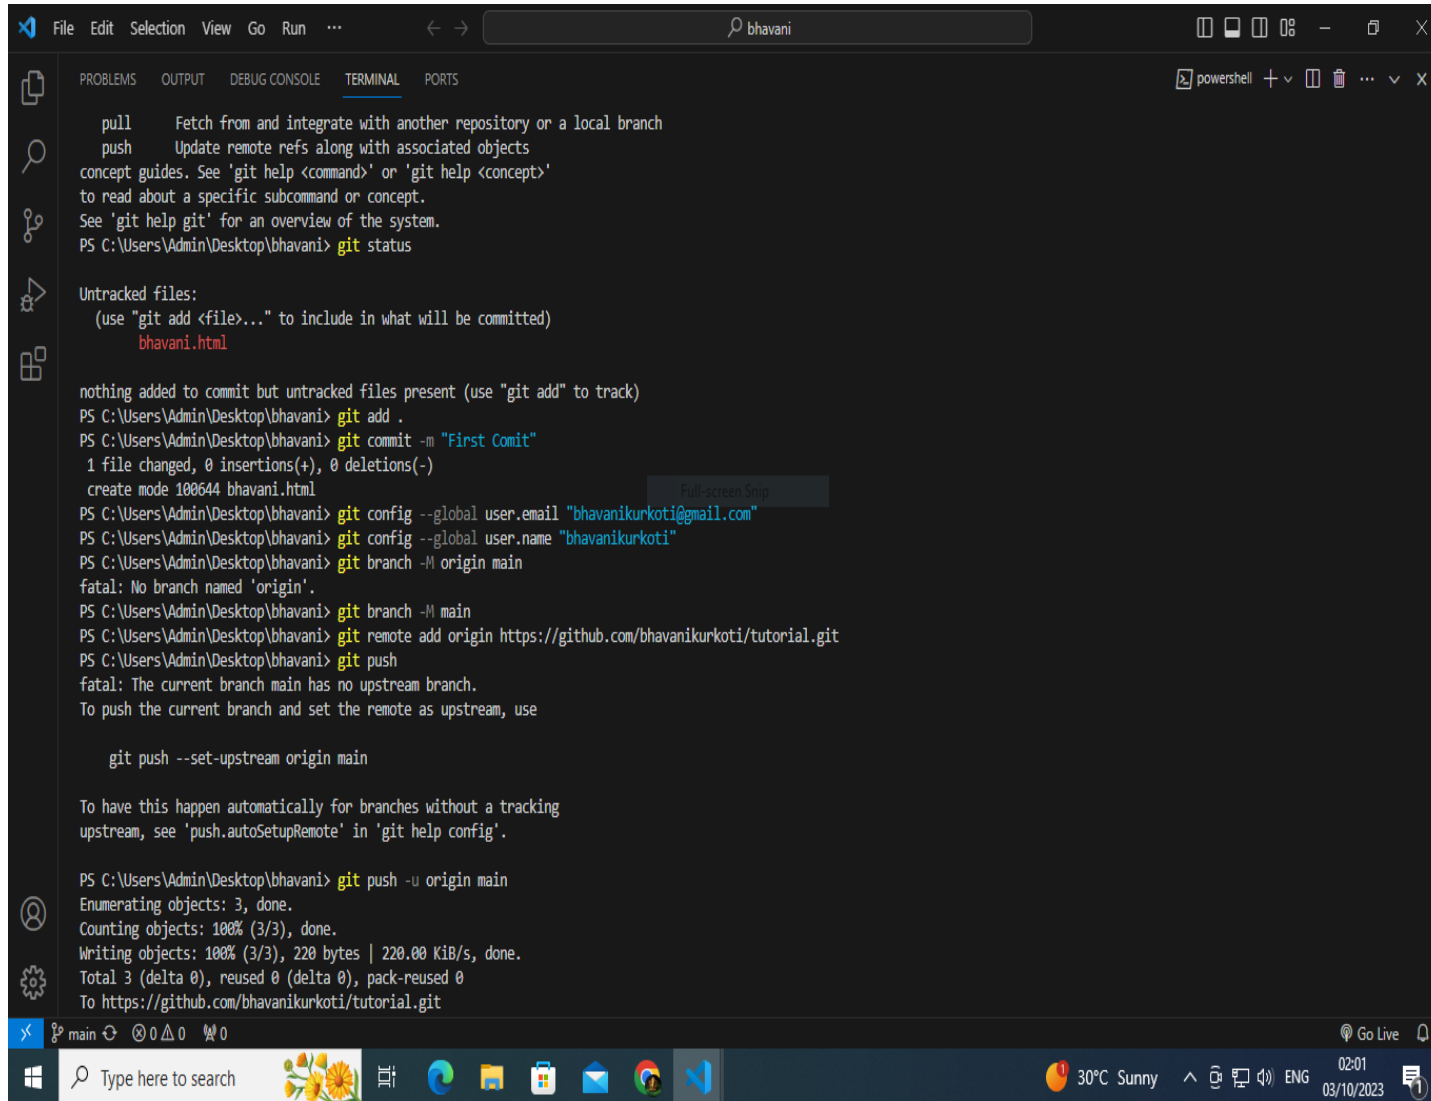

start a working area (see also: git help tutorial)
  clone      Clone a repository into a new directory
  init       Create an empty Git repository or reinitialize an existing one

work on the current change (see also: git help everyday)
  add        Add file contents to the index
  mv         Move or rename a file, a directory, or a symlink
  restore    Restore working tree files
  rm         Remove files from the working tree and from the index

examine the history and state (see also: git help revisions)
  bisect     Use binary search to find the commit that introduced a bug
  diff       Show changes between commits, commit and working tree, etc
  grep       Print lines matching a pattern
  log        Show commit logs
  show       Show various types of objects
  status     Show the working tree status

branch
  branch     List, create, or delete branches
  rebase     Reapply commits on top of another base tip
  reset      Reset current HEAD to the specified state
  switch     Switch branches
  tag        Create, list, delete or verify a tag object signed with GPG

collaborate (see also: git help workflows)
  fetch      Download objects and refs from another repository
  pull       Fetch from and integrate with another repository or a local branch
  push       Update remote refs along with associated objects
```

```
pull    Fetch from and integrate with another repository or a local branch
push    Update remote refs along with associated objects

concept guides. See 'git help <command>' or 'git help <concept>'
to read about a specific subcommand or concept.
See 'git help git' for an overview of the system.
PS C:\Users\Admin\Desktop\bhavani> git status

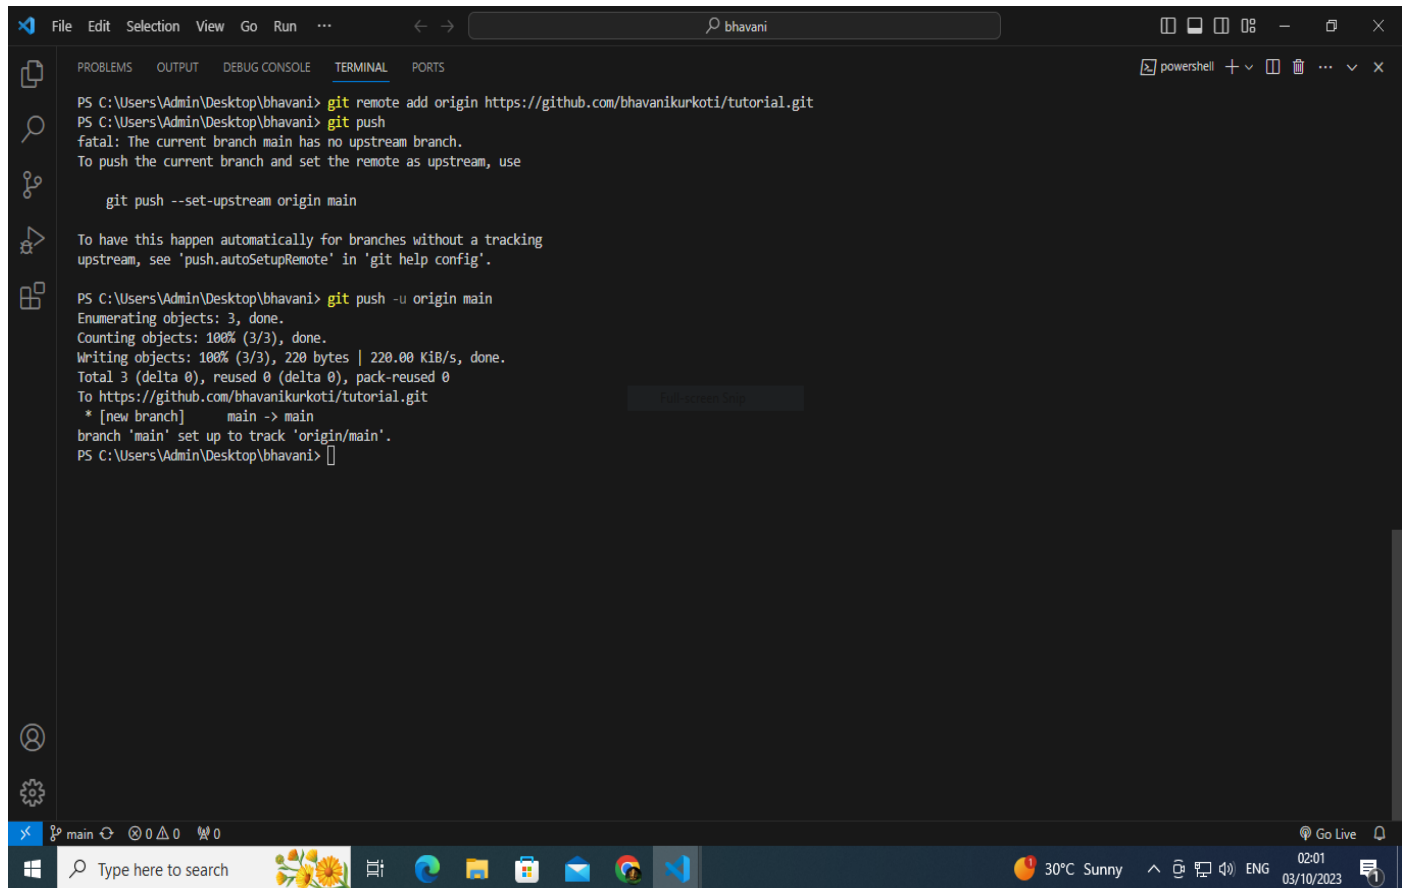

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        bhavani.html

nothing added to commit but untracked files present (use "git add" to track)
PS C:\Users\Admin\Desktop\bhavani> git add .
PS C:\Users\Admin\Desktop\bhavani> git commit -m "First Commit"
1 file changed, 0 insertions(+), 0 deletions(-)
create mode 100644 bhavani.html
PS C:\Users\Admin\Desktop\bhavani> git config --global user.email "bhavanikurkoti@gmail.com"
PS C:\Users\Admin\Desktop\bhavani> git config --global user.name "bhavanikurkoti"
PS C:\Users\Admin\Desktop\bhavani> git branch -M origin main
fatal: No branch named 'origin'.
PS C:\Users\Admin\Desktop\bhavani> git branch -M main
PS C:\Users\Admin\Desktop\bhavani> git remote add origin https://github.com/bhavanikurkoti/tutorial.git
PS C:\Users\Admin\Desktop\bhavani> git push
fatal: The current branch main has no upstream branch.
To push the current branch and set the remote as upstream, use

    git push --set-upstream origin main

To have this happen automatically for branches without a tracking
upstream, see 'push.autoSetupRemote' in 'git help config'.

PS C:\Users\Admin\Desktop\bhavani> git push -u origin main
Enumerating objects: 3, done.
Counting objects: 100% (3/3), done.
Writing objects: 100% (3/3), 220 bytes | 220.00 KiB/s, done.
Total 3 (delta 0), reused 0 (delta 0), pack-reused 0

```

The screenshot shows a Visual Studio Code interface with a terminal window open. The terminal displays the following commands and output:

```
PS C:\Users\Admin\Desktop\bhavani> git remote add origin https://github.com/bhavanikurkoti/tutorial.git
PS C:\Users\Admin\Desktop\bhavani> git push
fatal: The current branch main has no upstream branch.
To push the current branch and set the remote as upstream, use

    git push --set-upstream origin main

To have this happen automatically for branches without a tracking
upstream, see 'push.autoSetupRemote' in 'git help config'.
PS C:\Users\Admin\Desktop\bhavani> git push -u origin main
Enumerating objects: 3, done.
Counting objects: 100% (3/3), done.
Writing objects: 100% (3/3), 220 bytes | 220.00 KiB/s, done.
Total 3 (delta 0), reused 0 (delta 0), pack-reused 0
To https://github.com/bhavanikurkoti/tutorial.git
 * [new branch]    main -> main
branch 'main' set up to track 'origin/main'.
PS C:\Users\Admin\Desktop\bhavani>
```

The terminal window is titled "powershell" and has a search bar with "bhavani" entered. The Visual Studio Code interface includes a sidebar on the left with icons for Explorer, Search, Source Control, and Run and Debug. The bottom status bar shows the current branch as "main" and the file encoding as "UTF-8". The Windows taskbar at the bottom displays the search bar, taskbar icons, and system tray information including temperature (30°C), weather (Sunny), and date/time (02:01, 03/10/2023).
